

33 Multi Zone Security

Walk-Through Metal Detector - PC15000

VIVAKO

- ★ Accuracy due to advanced DSP technology
- ★ Model PC15000 is equipped with advanced DSP chip to eliminate noise caused by various interference frequencies around the equipment.

- ★ Accurate Hidden Location Representation of 33 Zones
- ★ The fine division of 33 zones expresses the position of hidden metal objects accurately left and right, so you can search more quickly.

- ★ There are 2300 Frequency setting: It can be adjusted on the control touchpad to reduce the noise from other walkthrough metal detectors or other environmental noise sources.

- ★ Built-in self-diagnosis programming checks the normal operation of the device by itself and informs you of the information and the corrective action.
- ★ Provide various optional interface ports

- ★ Model PC15000 provides mutual interface ports for other devices that require connection to use the device. For example, it can be used in connection with automatic door, Speed Gate, CCTV and DVR.

- ★ Equipped with transmitting and receiving antennas on both gates of the device, there is no degradation of transmitting and receiving sensitivity, and it can bring the effect of double searching.

- ★ Double Detection
- ★ Select by metal type
- ★ Excellent self-diagnosis programming
- ★ Easy installation transport and storage
- ★ Easy to operate User Interface

- ★ There is traffic flow lights on the entrance side panel LED bar. "Wait" (red) and "Proceed" (green) with international symbols.

- ★ All security settings are secured with a key lock and level of user access and the touchpad is easy to operate without the plastic cover.

- ★ Frequency Spectrum Analysis Programming allows searching by type according to metal material. Through this, it can be used according to the place and situation such as airport, company, school, performance hall, prison.

- ★ Compact packaging is convenient for transportation cost saving and storage, and is designed for easy installation and use within 10 minutes.

- ★ All actions can be opened with the simple operation through the LCD which displays detailed information.

33 Multi Zone Security

Walk-Through Metal Detector - PC15000

VIVAKO

Feature

- ★ 33 multi zone Metal Detection
- ★ There are up to 100 sensitivity levels that could be adjusted from 0 to 99
- ★ Superb Discrimination
- ★ Excellent Target Selection
- ★ Low False Alarm Rate
- ★ Uniform Detection within The Entire Archway
- ★ Bi-directional System
- ★ Can detect metallic, ferromagnetic objects such as guns, rifles, phone, knives, homemade sharp weapons, and explosives containing iron fragments, even small ferromagnetic metals (such as paper clips, paper pins, razor blades, stamp knives, needle, etc.)
- ★ Can allow up to 60 people per minute to pass through in both directions
- ★ Rugged, impact resistant design
- ★ IP55 protection standard

Performance Standards

Meets and exceeds NILECJ standard 0600.00 level 1-5 and F.A.A. Airport Security Regulation

Environmental Condition

- ★ Temperature: -20°C ~ +55°C
- ★ Humidity: 0-95%, Non-Condensing

Power Supply

- ★ 90~259 VAC, Non-Adjustable
- ★ 50-60 Hz +/- 5

Standard Configuration

- ★ Overall Loop Housing:
2200H x 1000W x 550D (mm)
- ★ Passage Clearance : 2000H x 750W (mm)
- ★ Weight : 60kg

Export Packing Information

- ★ Packing: Export Carton Box
- ★ Dimension: 2300H x 1200W x 950D (mm)
- ★ Weight: 75kg
